COURSEWORK

GRADUATE
OOPs
DSA
SQA
Software Engineering
Web Engineering
Cloud Computing
Artificial Intelligence
System and Network Administration
Database Systems

SKILLS

PROGRAMMING
• HTML5 • CSS3 • JS • React JS
• Tailwind • PHP • C++ • Git • GitHub
• MySQL
Familiar:
• Node JS • Express Js • MongoDB
• Rest APIs
Used libraries:
• Redux • Redux Toolkit • MUI
• Email JS • AOS • Flowbite
• Framer Motion • Aceternity

LANGUAGES

English
– Professional Working Proficiency
Urdu
– Native Proficiency

SUMMARY

As an Associate Software Engineer, I contribute to the development of robust software solutions, leveraging my expertise in coding, debugging, and collaborating with cross-functional teams. Dedicated to enhancing system efficiency and delivering high-quality code using the MERN stack to meet project objectives.

EXPERIENCE

MAF TECH | REACT JS INTERN
Aug 2023 - Nov 2023 | Eden Tower, Lahore
- Executed comprehensive development tasks independently and collaboratively within a team, overseeing the end-to-end creation of user flows, functionalities, and features for the "RUMZ" project using React JS.
- Deployed the web application to the cloud platform (e.g., Netlify).
- Participated in code reviews, sprint planning, and project discussions, contributing to team collaboration and knowledge sharing.

NESCO | JUNIOR DEVELOPER
July 2022 - April 2023 | Pak Arab, Lahore
- Efficiently entered and managed large volumes of data into databases with a high level of accuracy and attention to detail.
- Utilized HTML, CSS, and JavaScript to develop and maintain responsive and visually appealing websites.
- Specialized in WordPress development, creating custom themes and plugins to meet specific project requirements.

PROJECTS

4MATERIAL (MARKETPLACE FOR CONSTRUCTION COMMODITIES)
May 2023 – Aug 2023
- It reached its conclusion in the fourth year of my academic journey as the Final Year Project (FYP).
- It served as an internet marketplace for estimating costs and acquiring materials for both commercial and residential construction and renovation projects.
- The project was constructed utilizing the MERN technology stack.

WHEEL MOTO (CAR RENTAL SERVICE)
June 2023 – July 2023
- I played a pivotal role in a freelance project where my responsibilities included crafting a contemporary UI design and seamlessly integrating it with the project's backend which was built in PHP.
- The project was built using HTML, CSS, JavaScript, Core PHP, PDO, and MySQL technologies.

MEMES GENERATOR , SHOP MANAGEMENT SYSTEM AND TIC TAC TOE GAME
Aug 2020 – July 2023
- All projects were accomplished during the initial and subsequent years of my academic program.
- These projects were developed using the JS/ C++ programming language, employing both functional and object-oriented programming methodologies.
